

Schuler Incorporated - Canton, Michigan

Representing the Schuler Group in North America

Metalforming Systems and Technical Services

With almost \$1 billion in global sales, Schuler is regarded worldwide as the technological and global market leader for metalforming systems. Holding more than 600 active patents, Schuler brings state of the art custom solutions and standard market focused solutions to its customers.

Schuler Incorporated, headquartered in Canton, Michigan, provides sales management and project coordination for new equipment from the Schuler Group to the U.S., Canada and Mexico.

We also support life cycle management for existing equipment. Our local technical services for installed press system equipment are available for all brands and types of metalforming equipment.

Our goal is to provide turnkey solutions for new equipment, modernization and maintenance from a single source with professional project management. Key account focus, with support including extensive process knowledge and experienced engineering resources, ensures quality and on-time delivery to our customers at a competitive price.
