

*BEING THE CORE OF THE WATER-HYDRAULIC,
THE PRESSURE INTENSIFIER IS ONE OF
THE IMPORTANT FUNCTIONAL COMPONENTS
IN THE HYDROFORMING SYSTEM.
SUDDEN FAULTS MAY CAUSE COSTLY
DOWNTIMES. ONLY REGULAR MAINTENANCE AND SERVICING GUARANTEES
A HIGH LEVEL PRODUCTION RELIABILITY.*

Schuler Service

Maintenance of Pressure Intensifiers for Hydroforming Systems

- Service, maintenance and corrective maintenance
- World wide exchange-service

Higher Production Reliability through Maintenance of Pressure Intensifiers

In order to the high level production reliability of your hydroforming system and to minimize downtimes in an event of fault, Schuler offers extensive services for the most important functional component: the Pressure Intensifier. The know-how and the excellent technical equipment of Schuler guarantee you strict standards.

**Service
Maintenance
Corrective
Maintenance**

■ Precision and Safety Awareness

Design and production ask for a maximum of both. You can continue to rely on this in all services, maintenance and corrective maintenance works.

■ Certificated Quality

All delivered units have to pass a detailed function test under maximum pressure on our test-stand. Any defects will be detected immediately.

■ Minimum Downtimes

Due to our world wide exchange-service downtimes can be avoided problem-free during work on your Pressure Intensifier.

**World wide
Exchange-
service**

The Pressure Intensifier test-stand in the Schuler Technology Center at our location in Wilnsdorf.

- Test bench with measuring system, monitoring camera and visual display terminal
- Realisation of functional tests under maximum pressure (up to 3,500 bar)
- Software-supported Pressure Intensifier monitoring
- Issuing of inspection sheets.

Our Service offerings include

Technical Service

- Comprehensive Service
- ■ Routine Maintenance
- ■ Preventive Maintenance
- ■ Replacement Parts and Repairs
- Remote Teleservice
- Equipment Relocation

Know-how Transfer

- Production Support
- Customer Training (Schuler Academy)

Performance Enhancements

- Line Optimization
- Rebuilds and Modernization
- Die and Process Technology
- Used Equipment

Schuler lines are working efficiently worldwide producing parts of the highest quality. Schuler Service, with a staff of over 450 people, help you to stay ahead of the competition: With technical service, know-how transfer, and innovative concepts for modernization and performance enhancements.
