

## Roller service

- High performance
- Professional
- Expeditious

Schuler provides a wide variety of services for press equipment. In regard to washing machines, this includes reconditioning, repairing and recovering any type of rolls in use and new rolls used for blank washer or coil washers. This of course includes pre-assembled bearing units. The know-how of Schuler as the OEM of these machines, combined with the use of specialized measuring equipment and our experience in the application of various coating materials enables us to support our customers in any questions relating to quality and processes.

**Please contact us for further information.**
